

## Gärtner's fruit and berry fertiliser

- gives plants strength and healthy growth
- promotes fruit set and increases harvest yields
- makes the fruit pulp less susceptible to fungal disease
- organic content improves soil activity
- spread evenly around the plants and work gently into the soil

### Required quantities:

- for new planting: spread 60 g/m<sup>2</sup> in the area of the planting rows and work gently into the soil
- for existing crops, 1st dose: 60 g/m<sup>2</sup> in spring (March/April)
- for existing crops, 2nd dose: 60 g/m<sup>2</sup> directly after the harvest
- for existing crops, 3rd dose: 40 g/m<sup>2</sup> approx. 4 weeks after the 2nd dose as reserve fertilisation

### Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

### Tips:

- When planting new berry crops, provide the soil with sufficient organic material, add 5 – 10 l/m<sup>2</sup> plant humus and work farmyard manure or compost approx. 20 cm down into the soil.
- Aim for a soil pH value of 6.5 – 7.5 and carry out liming if necessary.

### Dosage of Gärtner's fruit and berry fertiliser:

- 1 handful approx. 40 g
- 1 tablespoon approx. 15 g
