

Gärtner's garden and lawn lime

- for use in lawn areas, ornamental gardens and fruit and vegetable cultivations
- improves soil structure in the long term and promotes natural soil fertility
- activates soil life
- releases nutrients contained within the soil and makes them available to plants
- prevents natural soil acidification and reduces moss formation
- increases the harvests and quality of the garden products
- can be used throughout the year, but ideally in spring and autumn
- can be spread cleanly and easily thanks to its fine-grained structure

Required quantities:

- for preservation liming: 100 – 125 g/m² on sandy soil
- for preservation liming: 200 – 250 g/m² on loamy and clayey soil
- when planting for the first time, mix approx. 10 kg/m³ with the planting soil
- for recovery liming: up to 500 g/m²

Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

Tips:

- After spreading, work gently into the soil.
- Lime the soil every three years to keep the pH value at a constant level.

Dosage of garden and lawn lime:

- 1 handful approx. 110 g
- 1 tablespoon approx. 25 g
