

Gärtner's lawn fertiliser with long-term effect

- suitable for all lawn areas, both for ornamental lawns and sports turf
- ensures a deep-green, stronger lawn
- provides the lawn with all necessary nutrients ideally
- promotes even growth with dense lawn formation and promotes root penetration
- ideally, spread on dry soil a few days after mowing
- **avoid getting the fertiliser on flagstones, patio slabs, wooden flooring or clothing because this may lead to rust stains**
- **spread in still air conditions**
- **after application water the lawn sufficiently and do not walk on it for a few days**
- **remove fertiliser residue from shoes and keep pets away**

Required quantities:

- from March to September: spread approx. 30 g/m² evenly

Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

Tip:

- When spreading by hand, spreading in a crisscross pattern is recommend to ensure even distribution of the fertiliser. Divide the amount of fertiliser up and spread it once lengthwise and once crosswise.

Dosage of Gärtner's lawn fertiliser with long-term effect:

- 1 handful approx. 50 g
- 1 tablespoon approx. 20 g
