

Gärtner's lawn fertiliser with weed killer

Product description:

- Gärtner's lawn fertiliser with weed killer ensures reliable weed control and lawn fertilisation in one operation.

Rids lawns of weeds quickly and makes them thick, plush and green.

- Eliminates typical lawn weeds via leaves and roots.
- With slow-release fertiliser for 100 days.
- Controlled nutrient release for even growth.
- Compatible with all types of lawn.
- Easy and safe to use.

Range of effects:

- **Highly effective against:** shepherd's purse, hornwort, knotweed, common yarrow
- **Sufficiently effective against:** hite clover, daisies, types of plantain, types of creeping buttercup
- **Insufficiently effective against:** bugleweed, autumn hawkbit, prunella, types of dock and speedwell

Application:

- The use of Gärtner's lawn fertiliser with weed killer is possible during the entire vegetation period (April – September), but not in the seeding year. Use in growing weather (damp and warm); do not use during drought, heat or at soil temperatures below 8 – 10 °C. A maximum of one application per crop or per year.

Waiting period/open land: lawn: There is no fixed waiting period.

Gärtner's lawn fertiliser with weed killer

Dosage:

20 g/ m² (up to 500 m²)

For even spreading we would recommend a garden spreader. When spreading by hand, the best way is to spread half the required quantity lengthwise and half crosswise (Wear work gloves when spreading/handling the product).

Streuwareneinstellungen:

For other garden spreaders please ask the manufacturer.

The setting recommendations are reference values that should be compared with the actual amount spread!

Streugeräte:

Gardena 410, 411, 412, 415	4
SUBSTRAL HandyGreen Universal Hand Spreader	5
SUBSTRAL EvenGreen Universal Box Spreader	4.5
SUBSTRAL EasyGreen Universal Centrifugal Broadcast Spreader	26.5
Wolf WE 250, WE 251, WE 252	3
Wolf WE 430	8

Einstellung:

spread twice over area

Notes on application:

- For best results, use 3 – 4 days after mowing in damp, warm conditions when the weeds have sufficient leaf mass. The lawn should be damp before use; water beforehand if necessary.
- The fastest and best effect is achieved when Gärtner's lawn fertiliser with weed killer sticks to the weeds for 1 – 2 days. Rain or watering 2 – 3 days after application enhances the effect.
- The lawn should be mown 7 days after application at the earliest.
- Other areas must not be touched because they may be damaged. Trees will not be harmed.
- Do not use the first two lots of cuttings after application for mulching. Compost can be used after it has composted completely.
- The weed killer has no lasting effects.
- Do not use the treated lawn area for playing or lying on until after it has been mown once.
- Do not use any mown or harvested material from the year of application for feed.
- The product contains the active ingredients 2,4 D and Dicamba: mechanism of action (HRAC group): 0.

To avoid harm to people and the environment, please follow the instructions precisely.

Gärtner's lawn fertiliser with weed killer

Areas and rules of application as set out by the regulatory authority:

To be used on dicotyledonous lawn weeds. Use only in the areas of application stated in the instructions and only in accordance with the rules described here.

Application by non-professional users permitted. (only for pack sizes $\leq 500 \text{ m}^2$)

Area of application	Cultivated area	Application	Required amount
Open land, home gardens and allotments	lawn	During the vegetation period; do not spread in the seeding year	20 g/m ² Max. 1 per area or per year

Do not allow the product and/or its containers to enter bodies of water. (Do not clean spreaders in direct proximity to surface waters/prevent indirect entry via yard and street drains.)

Notes on user protection:

Avoid any unnecessary contact with the product. Misuse can lead to damage to health. Store product away from children and pets. Do not eat, drink or smoke when handling the product. Store separate from drinks, foods, stimulants and animal feed. If medical advice is needed, have product container or label at hand.

For personal protective equipment requirements when handling pesticides, the instructions on the safety data sheet and the instructions for use of the specific pesticide and the BVL guideline "Personal protective equipment when dealing with pesticides" from the Federal Office of Consumer Protection and Food Safety (www.bvl.bund.de) must be observed.

Wear work clothes (if no specific protective clothing is required) and sturdy shoes (e.g. rubber boots) when spreading/handling pesticides. Wear a long-sleeved shirt, long trousers and sturdy shoes when spreading/ handling pesticides.

Do not walk on treated areas as walking on treated areas is not permitted for uninvolved third parties during the application and on the day of the application.

Gärtner's lawn fertiliser with weed killer

Notes on environmental protection:

Use of the product in or in direct proximity to surface water or coastal waters is not permitted (Section 12 Paragraph 2 German Plant Protection Act, PflSchG). Independently of this, the binding minimum distance from surface waters as prescribed by state legislation must also be maintained. Infringements may incur a fine of up to € 50,000. Products and their residue, emptied containers or packaging and rinsing fluids must not be allowed to enter any bodies of water. This also applies to indirect entry via the sewer system, yard and street drains and rainwater and drainage channels.

The product is categorised as not harmful to bees (B4) up to the highest required quantity or application concentration set out by the approval if a required quantity has not been set (B4).

The product has been categorised as non-harmful to populations of relevant beneficial insects, predatory mites and spiders. The product is poisonous to algae and higher aquatic plants.

First aid:

Change any clothing that is contaminated with the product. If there is skin contact, wash with plenty of water. If there is eye contact, rinse for several minutes under flowing water with eyelids open. If the product is ingested, rinse your mouth out and drink plenty of water. Consult a physician if complaints persist.

Storage and disposal:

Only put packaging out for recycling if it is completely empty. Take contents, or containers with any residual product, to collecting points for household chemicals. Store in a cool, dry place; close any packaging that has been opened tightly. Store away from children and pets.

Since the use of this product is outside our influence, we assume responsibility only for consistent quality.

Gärtner's lawn fertiliser with weed killer

Herbicide granulate

Active ingredients: 8.0 g/kg (0.8 % weight) 2,4-D
and 1.2 g/kg (0.12 % weight) Dicamba

To avoid harm to people and the environment, please follow the instructions precisely.

Read the label before use. Do not eat, drink or smoke while using the product. Keep out of the reach of children. Contains 2,4-D and methylene urea. May cause allergic reactions. If medical advice is needed, have product container or label at hand. Take contents, or containers with any residual product, to collecting points for household chemicals.
