

## Gärtner's rhododendron and ericaceous plant fertiliser

- specially tailored to ericaceous plants such as rhododendrons, heathers, hydrangeas, azaleas and fuchsias
- balanced combination of nutrients ensures lavish, colourful flowers
- promotes natural growth and a beautiful green shade of leaves
- spread evenly around the plants and work gently into the soil
- water the plants after fertilising
- fertilisation in or after August is not advisable

### Required quantities:

- 1st dose: 35 – 40 g/m<sup>2</sup> in early spring (end of March until the end of April)
- 2nd dose: 30 – 35 g/m<sup>2</sup> in June/July

### Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

### Tip:

- When planting for the first time, measure the planting holes generously and mix a plant substrate that is suitable for ericaceous plants into the soil.

## Dosage of Gärtner's rhododendron and ericaceous plant fertiliser

- 1 handful approx. 40 g
- 1 tablespoon approx. 15 g
