

Gärtner's tomato fertiliser

- organic mineral fertiliser for prolific flowering and strong fruit growth
- for tomatoes, cucumbers, courgettes, peppers and aromatic herbs
- very well tolerated and rapidly effective
- also suitable for seedlings

Required quantities:

- 1st fertilisation: in spring, for soil cultivation, spread evenly around the plants (50 – 60 g/m²) and work gently into the soil. Do not pour the fertiliser directly into the planting hole.
- 2nd fertilisation: approx. 6 – 8 weeks after planting, spread evenly around the plants (50 – 60 g/m²) and work gently into the soil.

Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

Tips:

- Tomato leaves should be able to dry out as quickly as possible after precipitation.
- A generously measured film hood protects plants from excessive moisture.
- Air movement during flowering time or shaking the flowers by hand ensures better pollination and thus fructification.

Dosage of Gärtner's tomato fertiliser:

- 1 handful approx. 40 g
- 1 tablespoon approx. 20 g
