

Gärtner's lavender fertiliser

- promotes the healthy growth of all types of lavender with its natural raw materials
- for dense foliage, even growth and long-lasting flowering phases
- easy to spread; its balanced nutrient composition sets it apart from others
- the organic ingredients guarantee even nutrient supply for months
- in addition to nitrogen, phosphorus and potassium, it also has a high proportion of organic matter for humus supply
- fulfils the requirements for organic farming

Required quantities:

- For maintenance:
 1. approx. 50 – 80 g/m² in March/April
 2. approx. 50 – 60 g/m² in June/July
- Balcony or tub plants: 10 – 30 g/15 l of planting soil
1 x weekly during the growth phase

Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

Tips:

- During the entire vegetation period: for new and young plants spread approx. 40 – 50 g/m² evenly and work gently into the damp soil after planting.
- Do not apply fertiliser directly to the roots.

Dosage of Gärtner's lavender fertiliser:

- 1 tablespoon approx. 15 g – 20 g
