

Gärtner's lawn repair mix

Product description:

- Gärtner's lawn repair mix is a new kind of product, a ready-to-use mixture of seeds and fertiliser, for the quick and easy repair of bald patches on lawns.

Areas of application:

- Repair of bald patches on lawns caused by planter marks, intensive use, drought damage, dog urine etc.

Application:

- Remove any dead plant remains from the bald area and roughen the ground lightly.
- Spread the product equally thinly (300 g/ m²) onto the bald areas or 150 g/m² onto thinned-out areas.
- Water carefully and thoroughly, preferably with a garden shower at the finest setting.
- Always keep the substrate moist. The coconut substrate becomes discoloured and brighter when drying out, and this is the time for watering. The new lawn can be cut for the first time (approx. 7 cm) after it has grown solidly.

Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

Tips:

- The minimum ground temperature for sowing is + 10°C
- Shake before use!

Dosage of Gärtner's lawn repair mix:

- 1 handful, approx. 50 g
- 1 tablespoon approx. 20 g
