

## Gärtner's lawn scarifying mix

---

### Product description:

- Gärtner's lawn scarifying mix is an innovative product for the fast restoration of lawn surfaces after scarifying.

### Areas of application:

- After scarification lawn surfaces frequently look very ropy and take weeks to recover. Use Gärtner's lawn scarifying mix consisting of seeds, fertiliser and soil conditioner, to restore your lawn quickly.

### Application:

- Cut the lawn area as short as possible.
- Scarify the area in accordance with the manufacturer's instructions, rake thoroughly and remove any plant remains etc..
- Gärtner's lawn scarifying mix can be spread without any problems (approx. 30 g/m<sup>2</sup>).
- If there is insufficient soil humidity or a lack of precipitation, water the area immediately and keep it moist for 2 – 3 weeks.
- After the lawn has grown solidly it can be cut for the first time. Ensure the grass is not cut too short (approx. 7 cm).

### Application period:

Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
-----	-----	-------	-------	-----	------	------	--------	------	-----	-----	-----

### Tips:

- The minimum ground temperature for sowing is + 10°C
- Shake before use!

### Dosage of Gärtner's lawn scarifying mix:

- handful, approx. 50 g
- 1 tablespoon approx. 20 g
